Surface Size

Three Plastic Straws

Scissors

Liquid Soap

1 Cut the first straw at a slant.

Surface Area

2 Cut four petals in the second straw.

Surface Area

3 Use the third straw as it is. Dip it in soap solution.

4 On blowing you will see only a small soap bubble.

5 With the slant-cut straw you will be able to blow a bigger bubble.

The petals hold a lot more soap solution and hence make the largest bubble!

6 However, with the four-petal straw you will be able to blow the biggest bubble!
